FISHERIES

Memorandum for Mr. Bower:

There is enclosed herewith report of the Kuskokwim Fishing and Transportation Company. The company have inserted the information required and have changed the weight and value of the king salmon. They claim that they made an error in figuring. The other weights and values, they state, are correct for the fish which they secured from the Kuskokwim River. They have also included the cod which was secured by their vessels.

The Pacific Fisherman states that this company produced 93 tierces of mild cure salmon. The company advise, however, that they did not have any mild cure; that all of their salmon was "hard salted," as they call it, and the nearest head under which they could list it on their report was "dry salted."

Regarding the other persons who have not submitted reports, as referred to in various memoranda, we are doing our best to get in all the reports possible, by advising the delinquent parties, or by requesting them to submit reports through other persons who might know them.

Harry J. Christoffers
